

Willow Brook's Lillibet "Lilly" - Health Clearances

Orthopedic Foundation for Animals: [Lilly OFA Clearances](#)

CHIC Certified through Orthopedic Foundation for Animals. Canine Health information Center (CHIC) is given to a dog that has been screened for every disease recommended by the parent club for that breed and those results are publicly available in the database.

Heart/Echo: Normal

Hips: Good

Elbows: Normal

Eyes: Normal

Genetics Clear: CM, DM, CT, EIC, PRA, HNPK, Copper Toxicosis, Non-dilute.

Carrier: Stargardt. A dog that carries one copy of a genetic gene, **does not have the disease and will not develop symptoms**. A carrier dog is healthy and unaffected. A carrier does not pass on illness; puppies are only at risk if both parents carry the same gene.

DNA Clearances

Canine Genetic Health Certificate™

Call Name: Lily
Registered Name: Willow Brook's Lilibet
Breed: Labrador Retriever
Sex: Female
DOB: Aug. 2022

Laboratory #: 408178
Registration #: SS36517401
Certificate Date: July 18, 2023

This canine's DNA showed the following genotype(s):

Disease	Gene	Genotype	Interpretation
Centronuclear Myopathy	PTPLA	WT/WT	Normal (Clear)
Congenital Myasthenic Syndrome (Labrador Retriever Type)	COLQ	WT/WT	Normal (Clear)
Copper Toxicosis (Labrador Retriever Type) ATP7A	ATP7A	M/M	Two Copy Carrier Female
Copper Toxicosis (Labrador Retriever Type) ATP7B	ATP7B	WT/WT	Normal (Clear)
Exercise-Induced Collapse	DNM1	WT/WT	Normal (Clear)
Hereditary Nasal Parakeratosis (Labrador Retriever Type)	SUV39H2	WT/WT	Normal (Clear)
Macular Corneal Dystrophy (Labrador Retriever Type)	CHST6	WT/WT	Normal (Clear)
Progressive Retinal Atrophy, Golden Retriever 2	TTC8	WT/WT	Normal (Clear)
Progressive Retinal Atrophy, Progressive Rod-Cone Degeneration	PRCD	WT/WT	Normal (Clear)
Retinal Dysplasia/Oculoskeletal Dysplasia 1	COL9A3	WT/WT	Normal (Clear)
Skeletal Dysplasia 2	COL11A2	WT/WT	Normal (Clear)
Stargardt Disease	ABCA4	WT/M	Carrier

WT, wild type (normal); M, mutant; Y, Y chromosome (male)

Paw Print Genetics® performed the testing on the dog listed on this certificate. See the Laboratory Report for interpretation and recommendations based on these findings. The genes/diseases reported here were selected by the client. Normal results do not exclude inherited mutations not tested in these or other genes that may cause medical problems or may be passed on to offspring. The results included in this report relate only to the items tested using the sample provided. These tests were developed and their performance determined by Paw Print Genetics. This laboratory has established and verified the test(s) accuracy and precision with >99.9% sensitivity and specificity. The presence of mosaicism may not be detected by this test. Non-paternity may lead to unexpected results. This is not a breed identification test. Because all tests performed are DNA-based, rare genomic variations may interfere with the performance of some tests producing false results. If you think these results are in error, please contact the laboratory immediately for further evaluation. In the event of a valid dispute of results claim, Paw Print Genetics will do its best to resolve such a claim to the customer's satisfaction. If no resolution is possible after investigation by Paw Print Genetics with the cooperation of the customer, the extent of the customer's sole remedy is a refund of the fee paid. In no event shall Paw Print Genetics be liable for indirect, consequential or incidental damages of any kind. Any claim must be asserted within 60 days of the report of the test results. Genetic counseling is available at Paw Print Genetics.

Page 1 of 1

Coat Color and Trait Certificate

Call Name: Lily
Registered Name: Willow Brook's Lilibet
Breed: Labrador Retriever
Sex: Female
DOB: Aug. 2022

Laboratory #: 408178
Registration #: S536517401
Certificate Date: July 18, 2023

This canine's DNA showed the following genotype(s):

Coat Color/Trait Test	Gene	Genotype	Interpretation
D Locus (Dilute) - d^1 , d^2	MLPH	D/D	Non-dilute (does not carry dilute)
L Locus (Long Hair/Fluffy) - Lh^1 (Common Variant Found in Many Breeds)	FGF5	Sh/Sh	Shorthaired (does not carry long hair)

Interpretation:

This dog does not carry any copies of the d^1 or d^2 mutations and has a D locus genotype of **D/D** which does not result in the "dilution" or lightening of the pigments that produce the dog's coat color. This dog will pass one copy of **D** to 100% of its offspring and cannot produce d/d dogs.

This dog carries two copies of **Sh** which results in short hair. This dog will pass on **Sh** to 100% of its offspring.

Paw Print Genetics® has genetic counseling available to you at no additional charge to answer any questions about these test results, their implications and potential outcomes in breeding this dog.
