

Willow Brook's Lilibet "Lilly" - Health Clearances

Orthopedic Foundation for Animals: [Lilly OFA Clearances](#)

CHIC Certified through Orthopedic Foundation for Animals. Canine Health information Center (CHIC) is given to a dog that has been screened for every disease recommended by the parent club for that breed and those results are publicly available in the database.

Heart/Echo: Normal

Hips: Good

Elbows: Normal

Eyes: Normal

Genetics Clear: CM, DM, CT, EIC, PRA, HNPk, Copper Toxicosis, Non-dilute.

Comments

Genetic Test Status Test: Negative Abnormal: Heterozygous Homozygous

ELECTROCARDIOGRAM NOT PERFORMED

Date: 12/6/25 normal abnormal
 HR: 85 Method: Sinus lead 2
 Rhythm: Sinus

EXAMINATION RESULTS

NORMAL (CHECK ALL THAT APPLY)

No evidence for congenital heart disease
 No evidence for adult-onset inherited heart disease
Valid for 1 year
 Holter monitor required within 90 days for final clearance (see back of white form for additional information)

EQUIVOCAL (CHECK ALL THAT APPLY)

Congenital heart disease cannot be definitively diagnosed nor excluded
 Adult-onset inherited heart disease cannot be definitively diagnosed nor excluded

ABNORMAL (CHECK ALL THAT APPLY)

Evidence of congenital heart disease
 Evidence of adult-onset inherited heart disease

Diagnosis: ARVC ASD DCM MVD MMVD PDA PS SAS/AS TVD VSD Other Arrhythmia

Severity: Mild Moderate Severe

Comments (additional findings which would not result in a final abnormal diagnosis):

I DID verify microchip/tattoo on this dog
 I DID NOT verify microchip/tattoo on this dog
 NO MICROCHIP/TATTOO PRESENT

Coat Color and Trait Certificate

Call Name: Lily
Registered Name: Willow Brook's Lillibet
Breed: Labrador Retriever
Sex: Female
DOB: Aug. 2022

Laboratory #: 408178
Registration #: SS36517401
Certificate Date: July 18, 2023

This canine's DNA showed the following genotype(s):

Coat Color/Trait Test	Gene	Genotype	Interpretation
D Locus (Dilute) - d ¹ , d ²	MLPH	D/D	Non-dilute (does not carry dilute)
L Locus (Long Hair/Fluffy) - Lh ¹ (Common Variant Found in Many Breeds)	FGF5	Sh/Sh	Shorthaired (does not carry long hair)

Interpretation:

This dog does not carry any copies of the d¹ or d² mutations and has a D locus genotype of **D/D** which does not result in the "dilution" or lightening of the pigments that produce the dog's coat color. This dog will pass one copy of **D** to 100% of its offspring and cannot produce d/d dogs.

This dog carries two copies of **Sh** which results in short hair. This dog will pass on **Sh** to 100% of its offspring.

Paw Print Genetics® has genetic counseling available to you at no additional charge to answer any questions about these test results, their implications and potential outcomes in breeding this dog.

Blake C Ballif, PhD
Laboratory & Scientific Director

Christina J Ramirez, PhD, DVM, DACVP
Medical Director

Paw Print Genetics® performed the testing on the dog listed on this certificate. The genes/traits reported here were selected by the client. Normal results do not exclude inherited mutations not tested in these or other genes that may cause variation in traits, medical problems or may be passed on to offspring. The results included in this report relate only to the items tested using the sample provided. These tests were developed and their performance determined by Paw Print Genetics. This laboratory has established and verified the test(s)' accuracy and precision with >99.9% sensitivity and specificity. The presence of mosaicism may not be detected by this test. Non-paternity may lead to unexpected results. This is not a breed identification test. Because all tests performed are DNA-based, rare genomic variations may interfere with the performance of some tests producing false results. If you think any results are in error, please contact the laboratory immediately for further evaluation. In the event of a valid dispute of results claim, Paw Print Genetics will do its best to resolve such a claim to the customer's satisfaction. If no resolution is possible after investigation by Paw Print Genetics with the cooperation of the customer, the extent of the customer's sole remedy is a refund of the fee paid. In no event shall Paw Print Genetics be liable for indirect, consequential or incidental damages of any kind. Any claim must be asserted within 60 days of the report of the test results.
